Where is the Garden of Eden?

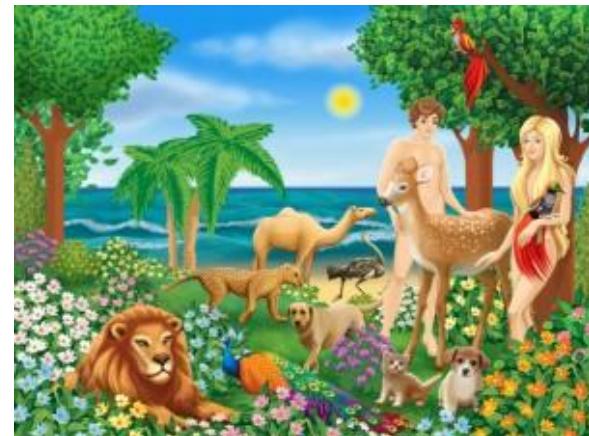

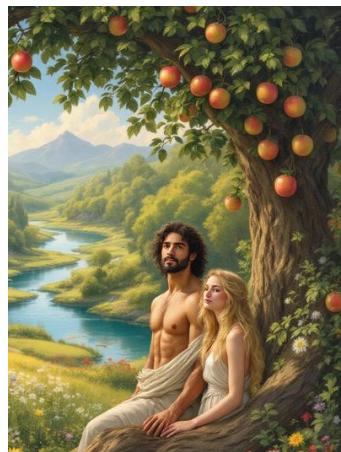

# 创世记第1章 石器时代

# 聖經是神話 傳說 還是歷史?

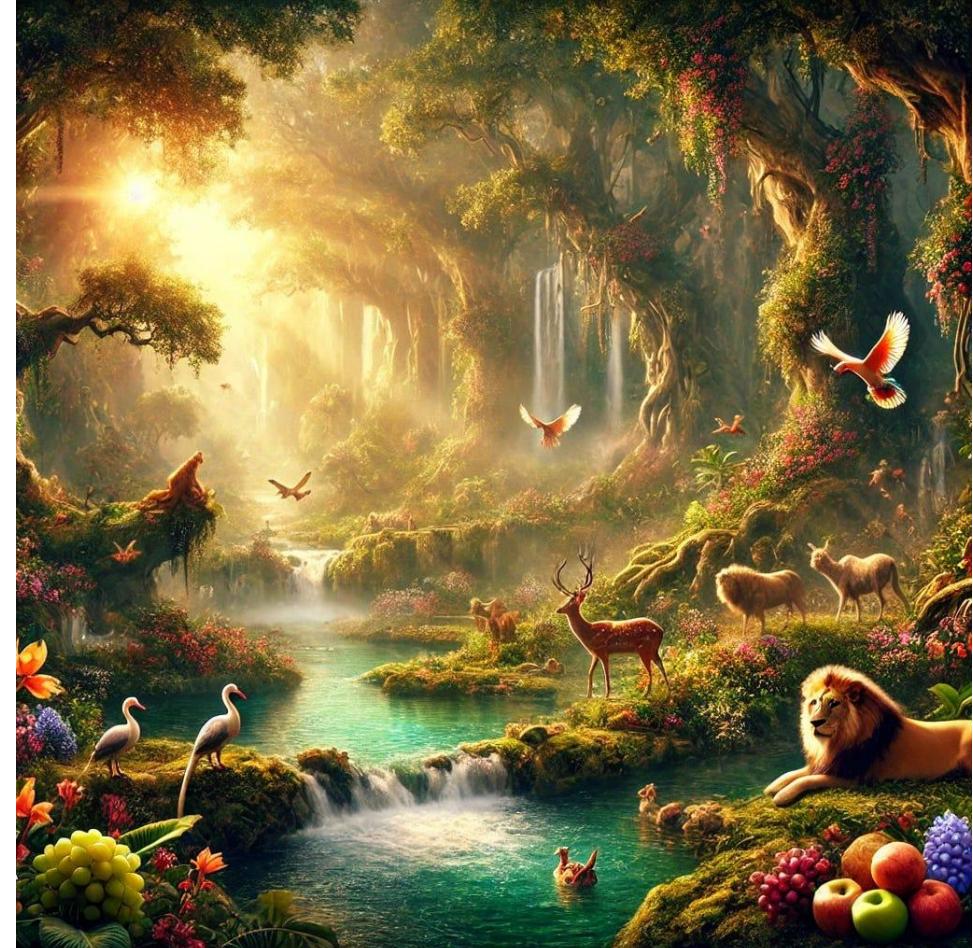

**Psalm 90:4 - a thousand years are like a day in God's sight.**  
诗篇 90:4 - 在神眼中，千年如一日。

In the Garden of Eden, the original human diet consisted of plants, grains, and fruits, making Adam and Eve strict vegetarians. God gave humanity permission to eat meat only after the global flood, as recorded in [Genesis 9:3](#).

## AI Generated Garden of Eden

**6,000-12,000 Years Ago?**

# 创世记第2章

Hebrew calendar places the creation of Adam and Eve in the year 3760 – 4004 BCE.

ChatGPT

<sup>8</sup> 耶和华神在东方的伊甸立了一个园子，把所造的人安置在那里。<sup>9</sup> 耶和华神使各样的树从地里长出来，可以悦人的眼目，其上的果子好做食物。园子当中又有生命树和分别善恶的树。<sup>10</sup> 有河从伊甸流出来，滋润那园子，从那里分为四道。

<sup>11</sup> 第一道名叫**比逊**，就是环绕哈腓拉全地的。在那里有金子，<sup>12</sup> 并且那地的金子是好的，在那里又有珍珠和红玛瑙。

<sup>13</sup> 第二道河名叫**基训**，就是环绕古实全地的。<sup>14</sup> 第三道河名叫**底格里斯**，流在亚述的东边。第四道河就是**幼发拉底河**。

「比逊」意思是喷出，「哈腓拉」意思是沙土地。「比逊」河和「哈腓拉」现在已经无法确定在何处。「基训」意思是飞溅，现在已经无法确定在何处。

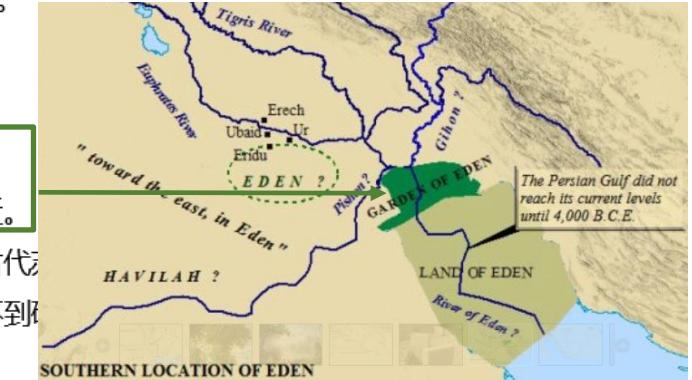

《圣经》里虽然详细描述了伊甸园的环境，却没有明确告诉我们它的精确位置。

创世记 2:10-14 提到，伊甸园有一条河分为四道：比逊河 (Pishon)、基训河 (Gihon)、底格里斯河 (Tigris, 又称希底结河) 和幼发拉底河 (Euphrates)。

学者和神学家基于这些线索，主要有几种推测：

## 1. 美索不达米亚南部说

- 认为伊甸园位于今天伊拉克南部或波斯湾附近。
- 理由：底格里斯和幼发拉底河都在这一带，古代文明发达。
- 问题：另外两条河（比逊、基训）在今天找不到。

## 2. 亚美尼亚高原说

- ✓ • 认为伊甸园在底格里斯和幼发拉底的发源地，即今天土耳其东部、亚美尼亚、伊朗交界地区。
- 理由：这个地区确实是多条大河的源头，地势高，水源丰富。
  - 问题：比逊和基训依然难以对应。

## 3. 非洲或阿拉伯半岛说

- 基训河被一些学者认作尼罗河或阿拉伯半岛的瓦地（季节性河道），比逊河可能在阿拉伯半岛。
- 这种说法会把伊甸园放在阿拉伯西北或红海周边。

## 4. 象征性解释

- 有些神学家认为伊甸园是象征“人与神完全交通的地方”，并不一定是地球上的实际坐标。

如果严格按照《创世记》的描述，要找到四条河的交汇处几乎不可能，因为古地理与今天差别很大，且洪水等事件可能改变了河流格局。

我可以帮你画一张地图，把这几种学说的伊甸园位置候选区标出来，方便直观比较。你要我画吗？

While the Garden of Eden is a central concept in the Abrahamic religions, there's no archaeological evidence to support its existence as a literal place. The biblical narrative describes it as a specific location with a river flowing out of it, splitting into four branches (Tigris, Euphrates, Pishon, and Gihon). However, archaeological and historical research places the most likely geographical location of the Garden of Eden in the Fertile Crescent, specifically in Mesopotamia (modern-day Iraq), where the Tigris and Euphrates rivers are located.

# Advanced Technologies: Ultrasound and Infrared

Sound travels faster with the wind

- The human can hear frequencies between 20 and 20 kHz. Bats Can hear up to 200 kHz for hunting at night. Elephants can detect sounds as low as 17 Hz for long-distance communication.

- Beyond visible light: We cannot see other parts of the spectrum, such as ultraviolet light or infrared light. Bees can see ultraviolet patterns on flowers. Some snakes can sense infrared light (heat). Cats can see in dim light.

# ChatGPT 考古技術有那些？

现代的考古学是文科加理科

## 一、傳統考古技術：

### 1. 實地調查 (Field Survey)

- 步行勘察地表、紀錄地點、收集地表遺物。
- 目的是找到潛在的遺址或了解遺址的範圍。

### 2. 地圖與文獻分析

- 研究歷史地圖、古文書、地方志，推測古代遺址位置。

### 3. 試掘 (Test Excavation)

- 小規模的試探性挖掘，用來確認是否有文化層或遺物。

### 4. 系統性發掘 (Systematic Excavation)

- 以方格為單位進行精確挖掘與紀錄。
- 所有文物、地層、結構都要詳細記錄與繪圖。

### 5. 層位學 (Stratigraphy)

- 根據地層的堆疊順序判斷不同時期的活動。

### 6. 型式學分析 (Typology)

- 分析陶器、工具等文物的形制與風格，以判斷年代與文化。

## 二、現代考古科技技術：

### 1. 遙感探測 (Remote Sensing)

- 使用衛星影像、無人機航拍或紅外線攝影探測地表變異。
- 幫助發現地表下的遺址痕跡。

声纳

### 2. 地球物理探測 (Geophysical Survey)

- 包括地磁探測 (Magnetometry)、電阻探測 (Electrical Resistivity)、地雷達 (GPR) 等。
- 可不破壞地面情況下探測地下構造。

### 3. 碳十四年代測定 (Radiocarbon Dating)

- 測量有機物中碳-14含量，用於確定年代（適用於五萬年內遺物）。

### 4. 熱釋光測定 (Thermoluminescence Dating)

- 測定陶器、磚塊等經高溫燒製物品的最後加熱時間。

### 5. DNA分析 (Ancient DNA, aDNA)

- 用於研究古人類、動植物的基因資料，推測族群、遷徙等。

### 6. 同位素分析 (Isotope Analysis)

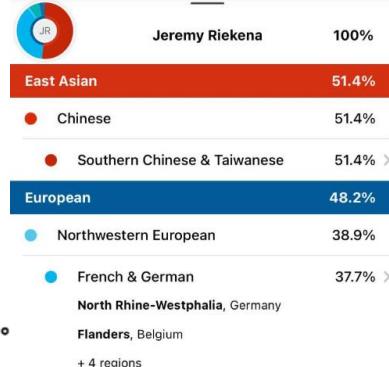

- 研究人類飲食、遷徙路線或生活環境（如氧、碳、氮同位素）。

### 7. 數位建模與三維重建 (3D Modeling & Reconstruction)

- 使用雷射掃描 (LiDAR) 或攝影測量 (Photogrammetry) 建立立體模型，用於展示與研究。

### 8. GIS 地理資訊系統 (Geographic Information System)

- 整合空間資料與考古資訊，進行空間分析與分布研究。

## Researchers find 'compelling evidence' of possible Noah's Ark remains in one country

Noah's Ark theory gains momentum as soil tests reveal organic remains

By **Andrea Margolis** · Fox News

Published May 26, 2025 8:53am EDT

A group of international researchers say they're getting closer and closer to identifying the possible remains of Noah's Ark – and new test results are promising.

AI Overview

**Ground-penetrating radar (GPR)** scans at the Durupınar Formation near Mount Ararat have revealed subsurface features suggesting a large, boat-shaped, man-made structure, rather than a natural rock formation. The radar detected angular, right-angled structures that could be walls, a central tunnel large enough to walk through, and what appear to be **three subterranean levels or decks**, matching descriptions in the Book of Genesis. The formation also shows significantly higher levels of organic material and potassium compared to the surrounding soil, consistent with **decomposed ancient wood**.

# Genesis 8:4 states that Noah's ark came to rest on the "mountains of Ararat" after the great flood.

While there have been numerous claims and explorations, **Noah's Ark has not been definitively found and identified.** The Durupinar formation in Turkey, a boat-shaped geological formation, has been a focal point of these claims, with some suggesting it as the remains of the Ark. However, scientific analysis, including radar scans and soil sampling, has not yielded conclusive evidence to confirm it as the biblical Ark. [🔗](#)

**ChatGPT: 4300 – 4700 BCE**

**Key Points:**

## The Durupinar Formation:

This site in Turkey, resembling a boat shape and located near Mount Ararat, has been a subject of much speculation. [🔗](#)

## Biblical Context:

The Bible describes Noah's Ark as landing on the "mountains of Ararat" after the flood. [🔗](#)

## Geological Analysis:

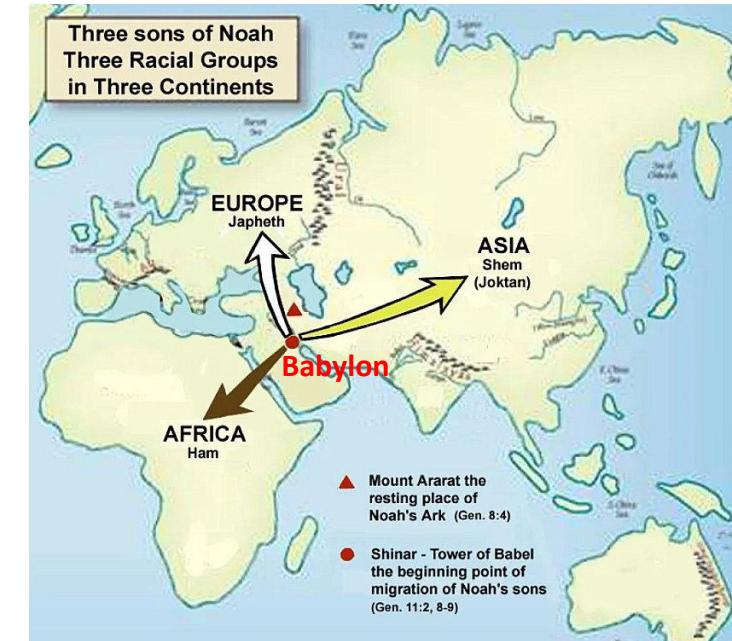

While radar scans and soil samples have shown anomalies at the Durupinar site, including what could be decaying wood and distinct soil composition, this has not been definitively linked to the Ark. [🔗](#)

## Ongoing Search:

Despite the lack of conclusive evidence, the search for Noah's Ark continues, with researchers exploring various locations and using different methods. [🔗](#)

## Pseudoscience Concerns:

Some expeditions and claims about finding the Ark are considered pseudoscience and pseudoarchaeology by some experts, [according to Wikipedia](#). [🔗](#)

## Abraham's Migration

2296-2065 BC

Genesis 11-13

- Terah is born in 2296 BC who speaks Hebrew and worships idols.
- Terah lives in Ur of Chaldea, where the tower of Babel is located.
- Abram (2166 BC), Nahor & Haran are all born to Terah in Ur of Chaldea.
- Haran, (Abram's 5 yr younger brother & Lot's father), dies in Ur.
- God orders Terah to move from Ur to Canaan in 2100 BC.
- Terah, intends to move to Canaan, but while en-route, finds Haran, after his dead son Haran, 1000 km NW and he dies there in 2091 BC (205 yrs).
- God makes 3 promises (nation, land, seed) to Abram at age 75 years old in Haran and tells him to move to Canaan.
- Abram migrates to Shechem & builds an altar after God repeats promises.
- Abram pitches his tent between Bethel and Ai and builds an altar.
- Abram moves to Egypt because of drought and sees the Pyramids.
- Abram returns to altar near Ai. Lot moves east & God repeats promises.
- Abram settles in Hebron, by the oaks of a man named Mamre.
- Sodom destroyed in 2067 BC, Isaac born in 2066 BC

Surveying the citadel

## Aerial LiDAR 激光雷达

Deploying the GEOslam Zeb horizon payload on our DJI M600 pro enabled a flight time of 25 minutes, which allowed us to scan an incredibly large section of landscape in each flight – Combined with Dual photogrammetry cameras to capture an even greater area in one flight than was previously possible.

'Ground Truth'

## Terrestrial LiDAR

Utilising the high accuracy of the Leica P50 we were able to capture sub mm details with high fidelity – This device also allowed us to combine aerial photogrammetry with ground lidar to create a large scale, high accuracy, photorealistic 3D model of Sela

Textured Dataset

## Aerial Photogrammetry

Applying photogrammetric images to large scale LiDAR surveys.

We captured over 5000 images and combined them with the LiDAR data.

# Route of Exodus: Red Sea Crossing

1250 - 1450  
BCE

## AI Overview

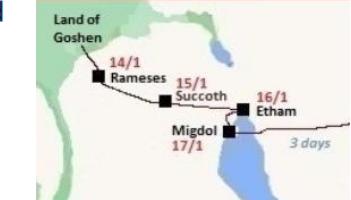

The traditional route of the Exodus Red Sea crossing places the event at the northern end of the Gulf of Suez, near modern-day Cairo, Egypt. However, some scholars and archaeologists propose alternative locations, including the Bitter Lakes or the Gulf of Aqaba, with the latter being supported by the possibility of a natural underwater land bridge.

Here's a more detailed look at the possibilities:

### 1 Traditional View (Gulf of Suez):

- This route is depicted in the film "The Ten Commandments" crossing near the northern end of the Gulf of Suez, near where the Suez Canal is located.
- This area is characterized by shallow marshes and lakes, which is inconsistent with the biblical description of a deep sea crossing.

### 2 Bitter Lakes Option:

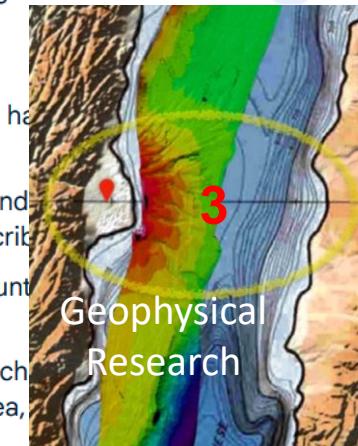

- This theory suggests the crossing occurred in one of the two large salt lakes north of the Gulf of Suez.
- While some scholars find this area more suitable for a natural crossing, it still faces challenges in matching the biblical narrative.

### 3 Gulf of Aqaba Option:

- This theory proposes the crossing happened across the Straits of Tiran.

This area has a deeper sea floor and is exposed by a strong wind, as described in the biblical narrative.

This location would also place Mount Sinai in modern-day Saudi Arabia.

Some archaeological evidence, such as chariot remains on the seabed, has been found in this area.

### Abstract

The ancient city of Jericho, located at the archaeological site of Tell es-Sultan west of the Jordan River and adjacent to the Ein es-Sultan spring on the edge of modern Jericho, has often been associated with the biblical city of Jericho and the story found in the book of Joshua. The identification of Jericho with Tell es-Sultan is not disputed, and numerous excavation teams have affirmed Tell es-Sultan as Jericho. While excavations have also uncovered the fiery destruction of a walled city at Jericho, the date of the fall of Bronze Age Jericho and the association of this destruction with the narrative in the book of Joshua have been a point of disagreement among archaeologists for more than a century. The first excavations at Jericho (Tell es-Sultan) occurred in 1868 under the direction of Charles Warren, followed by soundings conducted by FJ Bliss in 1894, the expeditions of the years 1907–1909 and 1911 by Ernst Sellin and Carl Watzinger, the excavations of 1930–1936 directed by John Garstang, the 1952–1958 project of Kathleen Kenyon, brief excavations by Shimon Riklin in 1992, and the most recent excavations and restorations by the joint Italian–Palestinian team from 1997 to 2000 under Nicolo Marchetti and Lorenzo Nigro, followed by the
